

Fujitsu Storage-Servers

KEEPING AN I ON YOUR IT

IDG-S is a value-added Australian distributor focused on delivering services and solutions for the highly specialised area of data storage, data security, data management, and data transport.

Fujitsu offers a complete range of enterprise storage systems designed to meet the requirements and challenges of the world's most sophisticated applications. These systems feature high performance, unequalled availability, strong security and innovative technologies.

Drawing on our own experience and extensive research and development, along with that of a number of partner organisations, we can provide storage solutions that robustly manage high rates of data growth and give widespread access to data at both the enterprise and departmental levels.

Combined with our renowned services and solutions, Fujitsu's enterprise storage systems give you the opportunity to control and exploit the immense value in your data.

More efficient IT throughout the lifecycle - Reduced budgets mean IT departments need to become more flexible, and it's not just about hardware. It's also about solutions. Based on industry standard architectures, PRIMERGY servers are the best answer to the do-more-with-less challenge. By helping organizations improve operational efficiency, PRIMERGY servers pay for themselves over and over again.

About Independent Data Solutions
